Saving Gaia:
When Corporations Go Green

INSIDER STORY:

Did you know that one of SSMC's Energy Conservation Initiatives have uncovered S\$420,000 in annual energy savings?

Q: How much did SSMC saved in this Green Energy conservation project?

A: By cutting down of Total electricity consumption by 1.25% in KWhr, we have saved 1.47% of SSMC electricity bill !

Q: What are the benefits?

A: As we use energy more efficiently, it helps to made SSMC a greener company. Moreover, we are achieving operation cost saving for SSMC's facilities.

The energy we saved can be used to supply for 450 homes of 4-room Singapore flats a year.

Q: How did SSMC achieve these results? Can you give one example of SSMC's green effort made.

A: Optimization of Chiller system which control the chilled water supply for the Fab

- VSD Chiller pump
- Chiller temperature control (LT/MT)
- Cooling tower fan
