

# SSMC is certified for QC 080000 IECQ HSPM

## Another step forward Environmental Protection and Business Sustainability

In Feb 2009 we advanced to a new level of quality standard for environment sustainability in attaining QC 080000 certification. Another step forward to strengthen the competitiveness of our customers.

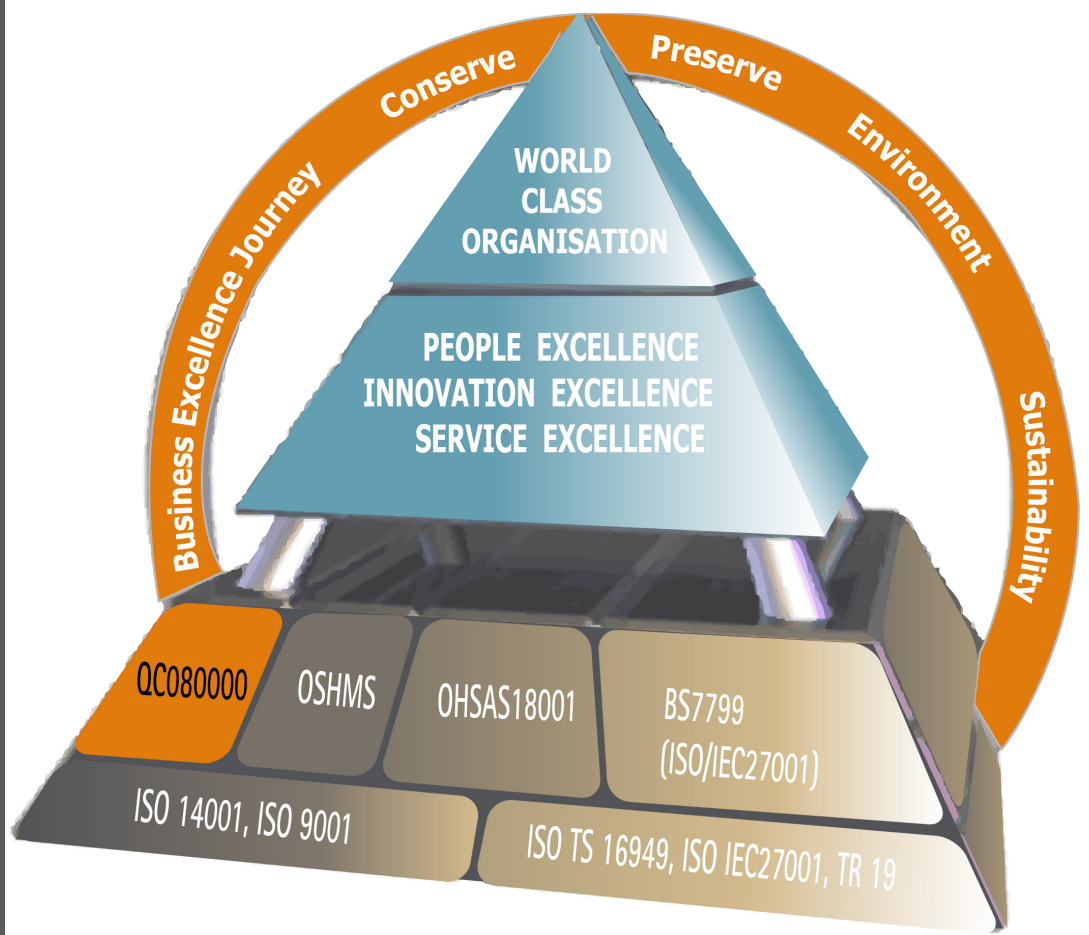

The QC 080000 standard is aimed at assuring electronic products we made are "hazardous substance free" with considerations in area of hazardous substance management for all operational procedures.

### MILESTONES

- 2008 QC 080000 (new)

- 2007 OSHMS, SEAA (Green Oscar)
- 2002 OHSAS 18001
- 2001 ISO14001, ISO9001

### What is QC 080000 IECQ HSPM ?

QC 080000 IECQ HSPM (Hazardous Substance Process Management) is the standard that the International Electrotechnical Commission (IEC)

Quality Assessment System for Electronic Components (IECQ) approved for Hazardous Substance Process Management.

### Business Excellence Journey

- "Congratulations to SSMC in achieving the QC 080000. As part of our Business excellence journey, following ISO14001/ISO 9001 in 2001 and OSHMS/OHSAS18001 in 2002, the certification of QC 080000 IECQ HSPM marks a further step supporting our environment, health and safety policy for the reduction of hazardous substances and green manufacturing; and towards environmental protection and business sustainability," said Jagadish, CEO of SSMC

### Strengthen our Business

- "We are proudly in accordance with our parent Fab, TSMC, in receiving the QC 080000 certification. It shows SSMC's commitment to be a responsible corporate citizen besides always strive to deliver best-in class foundry service, that strengthen the business competitiveness of our customers with environmental friendly products" said Ivan Hee, VP Business Operations.

### Preserving our Environment

- "I am extremely proud that SSMC has successfully achieved the QC 080000 certification, which is an excellence framework to assure our organization's continuous effort in preserving our environment to ensure long term sustainability" said On Nam, VP Corporate Services.
