

VALUE PEOPLE

INSPIRING THE ENGINEERS OF TOMORROW 激勵未來的工程師

On 1 November, SSMC was delighted to be part of the inaugural Electronics Industry Day organised by JTC Corporation. The event was graced by Mr. Chee Hong Tat Senior Minister of State for Trade & Industry and Education, with Mr. Ivan Hee, VP of HR & Business Operations of SSMC to “Chip In for a Smarter Future”. Together with companies from Pasir Ris and Tampines Wafer Fab Parks, SSMC had the opportunity to reach out to young talents from Institutions of Higher Learning (IHLs) including Polytechnics and Universities.

SSMC hosted about 40 students participating in the company tour. Some students had a hands-on experience with wafer handling in the L.E.A.N Centre, a simulated wafer fabrication environment. Meanwhile, the other students had the golden opportunity of stepping into our wafer fabrication facility for an eye-opening tour to fully immerse themselves in the cleanroom environment and also had a brief understanding of the wafer fabrication processes.

With “Value People” as part of SSMC’s core values, we are delighted to be able to inspire the younger generation with a personal experience to discover and gain an insight in the Semiconductor Industry. Thank you JTC Corporation for the opportunity to reach out to the next generation of talented engineers!
