### SSMC Acts and Collaborates to Raise Awareness for Sustainability

Singapore is a green and sustainable city. SSMC is also known to adopt green practices in the semiconductor industry. Due to our years of contribution towards environmental sustainability, Dr. Amy Khor (Senior Minister of State for Health & Environment & Water Resources) endorses our EcoVision and acknowledges our community outreach. To show our contribution towards environment sustainability, SSMC organized sustainability week during April 2019 with a sequence of fun-filled activities such as earth hour, e-waste collection, sustainability day and beach cleaning. Through all these events, SSMC creates a better awareness on water and environment conservation not only amongst SSMC employees, but also the

community partners and the younger generation to drive towards a zero waste nation and climate change actions.

- **Presence of Senior Minister of State for Health & Environment & Water Resources on Sustainability Day**

On 4 April, we are honored to have Dr. Amy Khor to grace our sustainability launch event. There were speeches by CEO Jagadish on SSMC's Ecovision and Dr Amy Khor on how she appreciates SSMC's initiatives in environment sustainability.

A representative from NEA also gave a talk on waste minimization and recycling in Singapore, which inspired all the audience to make a pledge by continually adopting 3Rs, greener practices, going towards zero waste and playing our parts in climate action for a sustainable future.

- **Collaborating with Government Agencies, Schools & Community**

To advocate our climate actions and efforts to be ZERO Waste nation, SSMC actively engages and builds partnership with MEWR, PUB, NEA, SCDF, schools, suppliers, neighborhood community. A series of activities took place in SSMC, which includes Booths set up by the government agencies, Eco-workshops and Eco-Garden tour.
